

# # 426– Streambank Stabilization Pack

## *Silky Dogwood - Redosier Dogwood - Buttonbush - Arrowwood Viburnum*

**Native vegetation provides all around protection against expedited streambank erosion. The deep roots act as anchors for the soil, while the canopy acts like an umbrella against precipitation.**

Arrowwood Viburnum (*Viburnum dentatum*)

**Two— 18” live stakes in each packet**

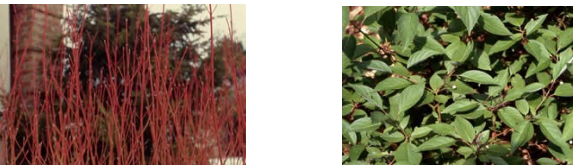

Hardiness Zone:	3 - 8
Mature Height:	6-12 Feet
Mature Width:	6-12 Feet
Features:	Creamy white flowers in broad, flat clusters (slightly unpleasant fragrance) in late spring; small, dark blue fruits in flat clusters in late summer (slightly showy); summer foliage is crisp and dark green; autumn color is red, but varies in intensity.
Culture:	Full sun to partial shade; moist, well-drained soil is best, but can tolerate wet sites and some dryness as well; prefers a slightly acid soil.
Mature Form:	Rounded, but sometimes takes on an upright appearance due to long, upright stems and suckers.
Native To:	United States
Soil Conditions:	✓ Dry ✓ Moist, Well-Drained ✓ Wet
Tolerance:	Alkaline Soil ✓ Dry Sites ✓ Salt Soil Compaction ✓ Wet Sites ✓ Wind
Uses:	Barrier ✓ Border Foundation ✓ Hedge Massing ✓ Naturalizing ✓ Screen ✓ Specimen
Foliage Color:	Green
Fall Foliage Color:	Orange Purple Red
Additional Notes:	Viburnums tend to be multi-season plants with ornamental value throughout a large part of the season.

Buttonbush (*Cephalanthus occidentalis*)

Hardiness Zone:	5 - 11
Mature Height:	6-12 Feet
Mature Width:	6-15 Feet
Features:	Tiny, creamy white flowers packed closely in a ball-like structure, in mid-summer; fragrant and attractive to bees; fruit also in ball-like structure, green with a red tint, turning brown late in the season.
Culture:	Full sun; must have moist soils and can grow in wet sites (even along the water's edge); tolerates alkaline soil.
Mature Form:	Broad rounded to rounded, but somewhat open.
Native To:	United States (and Illinois)
Soil Conditions:	Dry ✓ Moist, Well-Drained ✓ Wet
Tolerance:	✓ Alkaline Soil Dry Sites Salt ✓ Soil Compaction ✓ Wet Sites ✓ Wind
Uses:	Barrier ✓ Border Foundation Hedge Massing ✓ Naturalizing Screen Specimen
Foliage Color:	Green
Fall Foliage Color:	Green
Additional Notes:	In the north, the plant tends to be shorter (6 feet), than when grown in the south.

Redosier Dogwood (*Cornus sericea* or *Cornus stolonifera*)

Hardiness Zone:	2 - 7
Mature Height:	7-10 Feet
Mature Width:	8-10 Feet
Features:	Creamy white flowers in flat topped clusters in late spring; white to bluish-white fruit in late summer and early autumn; autumn color is purple to red, winter stems are red.
Culture:	Full sun; prefers a moist soil, but tolerates both wet and dry sites; tolerates alkaline soil.
Mature Form:	Rounded to broad-spreading
Native To:	United States (and Illinois)
Soil Conditions:	✓ Dry ✓ Moist, Well-Drained ✓ Wet
Tolerance:	✓ Alkaline Soil ✓ Dry Sites Salt ✓ Soil Compaction ✓ Wet Sites ✓ Wind
Uses:	Barrier ✓ Border Foundation Hedge ✓ Massing ✓ Naturalizing ✓ Screen ✓ Specimen
Foliage Color:	Green Variegated
Fall Foliage Color:	Purple Red

Silky Dogwood (*Cornus amomum*)

Hardiness Zone:	4 - 8
Mature Height:	6-10 Feet
Mature Width:	6-10 Feet
Features:	Creamy white flowers in flat topped clusters in late spring; pale to porcelain blue fruit, often blotched with white, for a short time in summer (eaten quickly by birds); autumn color is a mild purplish red.
Culture:	Full sun to partial shade; prefers a moist, well-drained soil, but tolerates wet and dry sites; tolerates alkaline soil.
Mature Form:	Rounded
Native To:	United States (and Illinois)
Soil Conditions:	✓ Dry ✓ Moist, Well-Drained ✓ Wet
Tolerance:	✓ Alkaline Soil ✓ Dry Sites Salt ✓ Soil Compaction ✓ Wet Sites ✓ Wind
Uses:	Barrier ✓ Border Foundation Hedge ✓ Massing ✓ Naturalizing ✓ Screen Specimen
Foliage Color:	Green
Fall Foliage Color:	Purple Red
